- High blood pressure
- Sleep disorder
- Muscle and joint aches and pains
- Heat or cold intolerance
- Hair loss
- Water retention
- Menstrual irregularities
- Dry/brittle hair and nails
- Irregular bowel habits

## What does the Canary Club Advanced Saliva Test check for?

Canary Club Advanced Saliva Test checks reproductive and adrenal hormone levels: active levels of estrogen (estradiol), progesterone, testosterone, DHEA-S, and 4 cortisol tests to determine a full day assessment of your overall stress management.

Our Advanced Saliva Test provides a fundamental assessment of your reproductive and adrenal hormones. Hormonal symptoms often overlap with one another so a full evaluation of a patient's overall hormonal profile is critical in diagnosing the core issues.

Test samples taken from saliva only - no blood spot.

(Same test as the [Basic Saliva Hormone Panel](#), but with 4 cortisol tests - as opposed to 1 with the Basic Panel.)

Test results are delivered via email in an easy-to-read assessment.

### Add-Ons

*The following are available as an add-on for Advanced Saliva Hormone.*

add **Estrone (E1)** - \$29 - One of several types of biologically active *estrogens*, *E1* is the main female hormone made by women usually after menopause.

add **Estrinol (E3)** - \$29 - *E3* is a biologically active *estrogen* that increases during pregnancy.

### Test Includes
