

ZRT HIS AdvancedPlus Hormone Profile (Canary Club formulated)

Price: \$299.00

Short Description

Designed especially for men, this is an overall assessment of male hormonal status, vitality and performance. Tests four glands: thyroid, adrenals, testes and prostate. 13 tests including PSA. (No Vitamin D test included.)

Description

His AdvancedPlus Hormone Profile, formulated specifically for Canary Club, tests your thyroid, adrenals, and reproductive hormones plus your PSA levels. The adrenal gland helps the body regulate its stress response by synthesizing corticosteroids and catecholamines, including cortisol and adrenaline. The reproductive glands produce the hormones testosterone, estrogen and progesterone that are critical to regulating mood, energy levels, and metabolism.

As men hit middle age they often describe themselves as feeling depressed or “burned out,” losing their “competitive edge,” or even their interest in pursuits they previously enjoyed in life.

Symptoms of Hormone Dysfunction

- Fatigue
- Depression
- Infertility
- Weight gain or loss
- Sleep disorder
- Muscle and joint aches and pains
- Heat or cold intolerance
- Hair loss

- Low Sex Drive

What is included in the Canary Club HIS AdvancedPlus profile?

A complete panel assessing adrenal and reproductive hormone levels, a complete thyroid panel, and a PSA test. It is an all-in-one, easy-to-use at home hormone test kit.

Testing can identify specific imbalances of male hormones linked with **erectile dysfunction and prostate problems**. The **bonus** of the **HIS AdvancedPlus Hormone Panel** is the addition of a **PSA blood spot test**.

This test includes:

Gonadal hormones: Testosterone, Estrogen (E2), Progesterone. Tested in saliva.

Adrenal hormones: Cortisol, the "master stress hormone", with four samples taken morning, noon, evening and bedtime to track adrenal function throughout the day. Also DHEA-S, related to weight and sex hormone issues. Tested in saliva.

Thyroid hormones: TSH, free T4, free T3, TPO. Tested in blood spot.

PSA: a protein produced by the prostate gland, PSA is an established indicator of prostate health risks. Tested in blood spot.

For just an additional \$65.00, our [Vitamin D test](#) can be easily added to the profile to detect **early warning** of hidden deficiencies and to monitor the effectiveness of supplementation levels.

Test Includes
