

Basic Thyroid Profile

Price: \$119.00

Short Description

The best overall assessment for your thyroid. Combines the four most clinically useful thyroid function tests, giving a more thorough assessment compared with monitoring TSH alone. Measures fT4, fT3, TSH, TPO.

Description

Our Basic Thyroid Profile Kit combines the four most clinically useful thyroid function tests, giving a thorough assessment of your thyroid function compared with monitoring TSH alone. This allows for a true evaluation of your hormonal disorder.

Thyroid hormones are critical for regulating the metabolic activity of cells. When the Thyroid is not functioning properly it can adversely affect your health even when hormone levels appear to be normal. Though often undetected by even the best medical practitioners, up to 10% of Americans have thyroid dysfunction and the percentage rises to 20% in women above the age of 60.

Our Thyroid Test Kits are a fast, safe way to discover if your thyroid gland is performing properly.

Symptoms of Thyroid Dysfunction

- Fatigue
- Depression

- Infertility
- Weight gain or loss
- Multiple chemical sensitivity
- High blood sugar and/or high lipids (cholesterol and triglycerides)
- Insomnia
- Chronic Fatigue syndrome or Fibromyalgia
- Menstrual Irregularities
- Hair loss
- Muscle and Joint aches or pains

What is included in the Canary Club Thyroid Profile?

The Canary Club Thyroid Profile tests all four of the hormones critical to normal thyroid function.

These include: (in blood spot)

TSH - Thyroid Stimulating Hormone

Free T4 - Thyroxine

Free T3 - Triiodothyronine

TPO - Thyroid Peroxidase Antibodies
