

ZRT Womens' Sex & Stress Hormone Panel

Price: \$210.00

Short Description

This test can provide insight into your sex hormone levels and stress levels at the same time.

The Women's Sex & Stress Hormone Panel is especially designed for women experiencing symptoms of estrogen hormone imbalance, often during perimenopause or menopause. Assessing the three estrogens: estrone (E1), estradiol (E2), and estriol (E3) is important for a wide angle view of female sex hormone balance. Progesterone testing is also included.

As stress can strongly affect female hormones, the adrenal hormone cortisol is tested four times, showing a full daily cycle of this stress hormone.

Description

This test can provide insight into your sex hormone levels and stress levels at the same time.

The Women's Sex & Stress Hormone Panel is especially designed for women experiencing symptoms of estrogen hormone imbalance, often during perimenopause or menopause. Assessing the three estrogens: estrone (E1), estradiol (E2), and estriol (E3) is important for a wide angle view of female sex hormone balance. Progesterone testing is also included.

As stress can strongly affect female hormones, the adrenal hormone cortisol is tested four times, showing a full daily cycle of this stress hormone.

Estrogen hormone imbalance coupled with high cortisol can result in symptoms including frequent headaches, irregular menstruation, decreased sex drive, weight gain, hair loss, chronic fatigue, brain fog and more.

Test Includes
